ABOUT

Consultant with experience delivering AI-enabled operational improvements, data analytics, and cross-functional process improvements across \$100M+ federal programs. Seeking high-impact roles in strategy, operations, or analytics.

PROFESSIONAL EXPERIENCE

International Business Machines Corporation (IBM)

Washington, DC

Data Analysis & Operations Consultant

June 2024 – Present

- Support a large-scale VA program by leveraging Hyperscience intelligent document processing and SQL validation workflows to resolve approximately 100 data extraction issues per release period.
- Diagnosed and deployed a detection rule for claimant page cross-out extraction errors, partnering with cross-functional teams to route flagged pages to human review, cutting total off-ramps by ~30%.
- Present findings, operational metrics, and risk assessments to 15 federal stakeholders in biweekly governance meetings, reviewing processing impact and extraction errors across 20,000+ documents.
- Built an AI-powered resume-parsing agent that automatically populates a Monday.com board with contractor onboarding details, replacing manual data entry and increasing processing efficiency by ~50%.
- Built a financial tracking system managing more than \$150 million in purchase orders, improving subcontractor cost visibility and cutting reconciliation time by ~90%.

Systems Planning and Analysis, Inc.

Alexandria, VA

Program Analysis Intern

May 2023 – May 2024

- Built an international treaty tracker to support NAVSEA's AUKUS agreement work, giving analysts a centralized reference for treaty obligations and deadlines.
- Performed cost analyses on submarine components which directly impacted strategic planning initiatives.
- Worked with a team of other interns to research and present a data-supported process improvement recommendation to company leadership.

EDUCATION

University of Virginia

Charlottesville, VA

B.A. Economics | Minor in Leadership & Public Policy | GPA: 3.846/4.000
